SOFTWARE ENGINEERING EXPERIENCE

Software Engineer Intern — Walmart Global Tech

Jun 2026 – Aug 2026

Sam's Club, Bake-n-Bite Team

- Built and shipped features to **production in live Sam's Club locations** for the Café Kitchen order-management app using **Next.js, React, TypeScript, and React Native Shell**.
- Designed and delivered a **configurable label-printing system** with per-UPC triggers, fulfillment-specific order numbers, printer-readiness/offline handling, and order-history reprinting.
- **Cut nil-pick rate from 6.4% to 4.0% and order-affected rate from 7.3% to 4.5%** at a pilot club by adding order numbers to pizza labels, helping members and Spark drivers match orders to receipts.
- **Consolidated label printing into a single app** and extended **Azure Cosmos DB schemas** to support order and printer-configuration fields.
- Integrated **Quantum Metric observability**, shipped UI redesigns, and implemented a future production-plan “Done” workflow for kitchen pizza-demand tracking.
- Improved reliability through **Jest unit tests, Playwright E2E coverage, and resolution of SonarQube findings**.

PROJECTS

Flight Plan with Cost and Time | Java

2025

- Enumerates valid flight plans between two cities and ranks the top three by cost or time using iterative backtracking.

Complex Navigation Game | Java

2024

- Navigates a multi-location complex and finds shortest paths using Dijkstra's algorithm.

HACKATHONS

CardiCrew (BlackHeart NGO) | JPMorgan Code for Good

2025

- Built a full-stack platform in 24 hours using Next.js, React, Node/Express, Firebase, and Gemini AI, with a real-time needs heat map and authenticated internal/public content controls.

FinSight AI | HackAI 2025

2025

- Built a full-stack financial analysis app using Next.js, React, Flask, LlamaIndex, LangChain, and OpenAI that ingests annual-report PDFs and answers questions through an AI chatbot.
